#### THE GAME

The year is 1942, the place Germany. War has broken out and you have been captured and placed in a high security P.O.W. camp. Victory may be far away, so it is your duty to escape, but this will not be easy. It will take careful planning and much patience, culminating in a skilful and resourceful implementation. In the camp you are closely guarded but while you follow the daily routine you will need to slip away unnoticed to reconnoitre the situation and collect tools and materials necessary for your chosen escape route. There are many avenues of escape, some difficult, all certainly dangerous and each one requiring different skills or equipment.

**CAMP GEOGRAPHY AND POSSIBLE ESCAPE ROUTES.** The camp is a small converted Castle on a promontory surrounded on three sides by cliffs and the cold North Sea. Official entry to the camp is by a narrow road through the gatehouse and all traffic must carry papers authorising their passage. Elsewhere the camp has been closed by either fences or walls and dogs are deployed to patrol the perimeter. These areas are watched by men from the observation towers and there are very few blind spots, at night powerful search lights comb the walls looking for any sign of movement. The prisoners are housed in pre-fabricated huts within the castle ground just to the side of a quadrangle that is used for roll calls and recreational purposes. In line with the Geneva Convention the prisoners must have exercise so an area has been provided and this is conveniently situated on the inland side allowing close up inspection of the southern fences.

#### CONTROLS

The game requires joystick control and Rambo's movement is determined by the direction in which the joystick is pushed.

The FIRE button activates any weapon system that you are carrying and must be pressed repeatedly for operation.

The different weapons systems at your command appear at the bottom of the screen and are selected by means of the SPACE BAR.

**S** KEY from MUSIC to SOUND EFFECTS.

**RUN/STOP** KEY PAUSES and RESTARTS the action.

#### THE GAME

The game takes place in approximately 1 million sq. feet (scale) of jungle featuring the P.O.W. camp, a secret Temple and many different types of terrain.

Colonel Trautman, your C.O. (Commanding Officer), has given you very precise orders... Find the P.O.W. camp, photograph the evidence using the automatic camera which is part of your standard equipment and then make your way North to the extraction point where a helicopter awaits you. You will then be automatically flown back to the safety of your base in Thailand.

Your orders are specific:

**"Do not engage the enemy."**

**"Do not attempt to rescue."**

However when you arrive at the P.O.W. camp and see your former comrade Banks, tied to a Bamboo Cross in the compound you know that another scenario will unfold; one in which you are the Hero! You must decide...

Ignoring your C.O. and using the knife, you cut your buddy free – now there is no turning back as you have alerted the camp guards. Taking Banks with you, you battle your way North towards the helicopter in an attempt to get transport to free all the P.O.W.s.

Having located the chopper you must return to the camp to find the main body of prisoners – again using your knife to cut their bonds, hurry to get them aboard for by now there is a full alert and the enemy's main weapon, a powerful helicopter Gunship is sent in pursuit. Now engage in combat with this fearsome

machine and escape with the prisoners to the safety of Thailand.

#### STATUS and SCORING

On screen information shows current score at the bottom of the screen and is included at the end of the game in the high score table which is fully displayed.

An "Energy Band" shows Rambo's strength reserve and is replenished upon completion of each stage.

Bonus points are achieved by collecting weapons hidden at strategic points.

#### WEAPONS SYSTEMS

Your choice of weapons is displayed at the bottom right of the screen and the comprehensive list includes KNIFE, ARROW, EXPLOSIVE ARROW, GRENADE, ROCKET LAUNCHER and MACHINE GUN. (Some of these weapons are available at the beginning, others are hidden in the terrain).

#### HINTS and TIPS

Try not to disturb or engage the enemy unnecessarily, especially on the way to the P.O.W. camp. (i.e. use of loud weapons will alert enemy activity).

Don't stand still in the camp and remember you will need your knife to cut free the solitary prisoner.

Inside the helicopter you can only fire the rocket launcher (which is hidden on board).

It can be very dangerous to deploy certain weapons in inappropriate circumstances.

If you rescue the first solitary prisoner there is no turning back – you are committed to becoming a Hero.

**GOOD LUCK!**

#### STATUS AND SCORING

On screen information displays. Points are awarded as follows:-

Helicopter	800	Submarine	1500
Truck	900	Tower	1500
Plane	1000	Bird	Variable
Missile base	800	Men	Variable

You begin with 5 lives on level 1 and a further 9 on level 2 with a bonus life every 25,000 points.

#### THE GAME

You are a member of the SOC (Special Operations Core) a crack regiment of Specialist Commandos picked for the most dangerous missions. Locked in a safe at the enemy headquarters is information... information so vital that the turning point of the conflict depends upon its discovery. To get to the headquarters means crossing jungles and deserts, manipulating many forms of transportation and harnessing a variety of weapons systems. Only the best will succeed on this deadly venture... Will you be one of them?

#### PLAYING

The game is divided into seven sections each of which must be completed to progress to the next one. Finally to the enemy headquarters itself and the vital points which must be located.

##### STAGE 1

Reach the enemy helicopter base with your missile equipped jeep. Transport lorries will try to block your way eliminate them with ground missiles and take out the helicopters with your air attack systems. Parts of the bridgework may be destroyed in which case you must hop over the damaged parts with your turbo boost (care is needed as this may affect your missile sequencing). Once at the base your next move is to steal a helicopter and begin your flight towards the jungle headquarters.

##### STAGE 2, 3, 4

These stages are all completed by helicopter across differing terrains. From desert to sea and then on over the jungle. Avoid the fighter planes sent out to destroy you and watch out for deadly missile silos (STAGE 2), Submarines (STAGE 3), and armed look-out posts (STAGE 4).

The following strategies might help:  
Take off quickly before the first wave of fighters, arrive and pay attention to your altitude – flying low is dangerous but will enable you to win more points (a bonus helicopter for every 25,000).  
Vigilance is required to spot the helicopters (refuelling sites), if you don't land on time there is no way back and lack of fuel is fatal. A good landing gains extra points and can be achieved by centering over the airfield.  
When you reach the jungle helpout you will be given a code enabling you to proceed towards the barracks.  
Switch off the computer and load in the final sections.

#### STAGE 5

Now you're on foot and the going gets really tough, negotiate the swamps and break through to the enemy barracks. Enemy guerrillas lob grenades and avoiding the explosions is a must, at night watch out for eyes, they will indicate the enemy's location and grenade source. Giant Toucans will fly low, scare them away with gunfire and duck to avoid their ferocious beaks which can prove deadly.

In the swamplands jump from island to island but remember when crouching you may not be able to spring far enough to avoid the suffocating quicksand.

##### STAGE 6

You've found the barracks, but to reach the main building you must traverse beyond the watchtowers and repel all hostile attacks. The following strategy may help:

At the beginning of the screen clear the way with hand grenades, this will give you some time to get your bearings.  
Crouching down while shooting and while moving under windows or watch towers will improve your chances and help gain ground.

##### STAGE 7

The final test, reach the bunker where the plans are hidden, find the safe and your home and dry. A few tips will help you here – Be careful with the doors, hide behind them to prevent them being opened. When on the stairs the enemy cannot see you, so make sure the coast is clear before stepping off. Remember grenades can bounce off walls, study their trajectory with care. This operation is difficult but essential, your success is a must... GOOD LUCK!

The "TOP GUN" game puts you in the pilot's seat of an F-14 jet fighter. 3-D vector graphics and split screen display allow one or two players to combat head to head or against the computer. Your armaments in this nerve-rattling aerial duel are heat seeking missiles and 20mm rapid fire cannon. Many skills have to be brought in to play such as reflexes, manoeuvring ability and accuracy to become the best of the best. "Top Gun" manoeuvres enter the danger zone!

#### GAMEPLAY

You are Maverick, a top fighter pilot. Your craft the F-14 fighter. It is a fast and deadly aeroplane equipped with different weapons and defence systems. Choose to combat against the computer controlled aircraft or go head to head and battle it out.

In 2 players mode – out manoeuvre your opponent and shoot him down with a direct hit from one of the missiles or a succession of shots from the machine guns.

#### WEAPON SELECTION

There are 3 weapon types which are selected in weapon mode. This is denoted on screen by a variation in the shape of the sights on the main display and the relevant icon is highlighted on the console.

Cross Hair	— Machine Gun/Cannon
Square Sight	— Side winder missile
No Sight	— Flare mode

#### SCREEN DISPLAY DIAGRAM

**MORALE** The morale indicator is situated to the left of the screen its colour denotes the current morale. Each time you find something useful or explore a different part of the camp your morale and score will increase accordingly.

However each time one of your possessions is discovered and removed your morale will decrease. Red Cross parcels and other goodies will arrive randomly throughout the game and increase your morale level. Capture and consequent punishment will reduce your morale enormously and if it ever reaches zero you will lose control and our hero will become just another member of the camp prisoners. The only remedy for this situation is a new game.

#### THE ALARM BELLS

The alarm bell has two functions, when it sounds in a short burst it denotes the commencement of meals, roll-calls etc and a message will appear at the bottom of the screen with the relevant information. When a potential escape is discovered out of bounds the alarm bell will ring continuously and this is the signal to the guards that an escape is in progress.

#### NEWS BULLETIN

Messages will appear on screen, keeping you fully informed of all news events within the camp, i.e. the discovery by the guards of hidden items etc.

#### SCORING

Your score points and increase your morale by discovering objects, using them and escaping – each of these activities will increase your score.

#### CONTROLS

The game is controlled by joystick in Port 2.

FIRE is pick up, use, drop object.

RESTORE – ABORT GAME.

RUN/STOP – PAUSE GAME.

The radar readout indicates the relative position of your enemy aircraft and the arrow indicator denotes that it is above or below you. The radar display flashes red when an enemy missile has been launched.

#### MACHINE GUN/CANNON

This can be operated when the enemy aircraft is in your sight – 25 direct hits are required to down it. A hit is denoted by a border flash and visual reference on the damage indicator. Heat levels of the weapon are displayed on the control panel.

#### SIDE WINDER MISSILES

To fire a missile it is necessary to fix the opponent directly on your sight for 3 seconds which enables the heat seeking element to "Lock-On" to the aircraft. However one direct hit is fatal!

#### FLARES

The flare is used as a decoy and is your only defence to the side winders, they must be used skilfully and with precision timing or the effect will be lost. The flare must be launched so that the enemy missile "thinks" the ultra high-heat magnesium flare is the jet exhaust, this way you can escape the deadly shot. Missiles can also be out manoeuvred by a skilful pilot (they "burn-out" after about 20 seconds) and a combination of moves and the astute use of flares should enable you to avoid destruction.

In one player mode you must engage and destroy three enemy aircraft before progressing to your next mission – pitting you against faster and more manoeuvrable craft. With two players you each begin with 3 aircraft and the winner is the one left flying. Good luck as you enter the Danger Zone!

#### HINTS AND TIPS

1. Use the machine gun sparingly, they may overheat and jam if fired continuously.
2. Try to position your craft behind the enemy – this is when he is at the most vulnerable and will find it difficult to shake you off.
3. Use the machine guns for short range and the missiles for long range attacks.
4. When banking use climb to achieve a greater rate of turn.
